Rich,

I assume that you are not coming today as referenced below. Any way we can do the work orders next week, the only new thing is that Paul needs to go home Saturday July 21st through and will return Tuesday July 24th and Joanna is aware of this. I guess I will see you on the 23rd

Have a good day

Dave. Thanks for staying on top of the funding situation.

Demobe Mark this Friday.

Put the site files into the Kemron trailer for this weekend. I will modify that, if necessary, on Monday 7/16. I will be onsite that day.

Thanks again.

Rich

Subject: RE: Dimock Water Funding

Rich,

I just had Paul review the numbers and by keeping Mark here on site but demobing July 31st, we would have enough money to keep Paul & I on site and demobe on Friday August 3rd.

To have Paul & I on site and demobing on Friday August 10th would require another estimated

Ex. 4 - CBI

We could significantly save money and allow Paul & I to remain on site until August 10th with the current funding by having Mark demobe this Friday since all of the EPA equipment will be gone (with the exception of the site records) by this Friday and if you are concerned about the security of them I would make the following suggestions

- 1- The files could be locked up inside the Kemron trailer inside the building and provide you with a key for access to it.
- 2- The files could be locked up in the waterproof tool box on Paul's truck
- 3- The files could be taken to the hotel and stored in our rooms

This would also allow to continue having Paul on site for 8 hours each day for Saturday & Sunday for checking the Water delivery systems out

Please let me know if you agree with any of these suggestions.

Thanks

thanks Dave. I just took a look at the dates for our schedule, based upon this week's events.

Although nothing has been decided, it looks like we will be notifying the residents on 7/23 and then giving them 10 business days to let us know how they want us to leave their systems. That puts us to the week of 8/6. So, we may have to squeeze out one more week. Let me know if that causes a problem.

Subject: Dimock Water Funding

Rich,
I requested for Paul to do projections for the site with our current funding. The Dimock Water Site will achieve 85% of the current ceiling around July 23rd and we are projecting to demobe date of July 31st with the current funding. I know that currently you plan to be completed by that date, however if things change this gives you a date with current operations that could be funded with the current ceiling.
